## PROFESSIONAL SUMMARY

Backend-focused Laravel engineer with 3+ years of experience building secure, workflow-driven **Enterprise Applications Across Governance, CRM, LMS, Inventory, and Academic systems**. Experienced in **architecting role-based systems, encrypted document lifecycle management, RESTful APIs, cron-based automation, and optimized relational database design**. Strong ownership mindset — independently handling requirement analysis, architecture planning, deployment, and post-production support.

## TECHNICAL SKILLS

- **Backend:** PHP, Laravel, CodeIgniter
- **Frontend:** Laravel, CodeIgniter JavaScript, AJAX, jQuery, HTML5, CSS3, Bootstrap, Vite
- **Database:** MySQL
- **Tools:** Git, GitHub
- **API Integration:** RESTful, SOAP, Third-Party Integration
- **Security:** Role-Based Access Control (RBAC), Encrypted Content Handling
- **Automation:** Cron Jobs, Scheduled Workflows
- **Deployment:** WHM, cPanel, Plesk, Shared Hosting, Production Release Handling

## PROFESSIONAL EXPERIENCE

### ISKCON Bangalore

December 2025 – Present

- Architecting governance and resolution workflow systems with encrypted document lifecycle management and role-based access control.
- Implementing automated tracking, recurring reminders, and Cron-based workflow processing.

### Ziga Infotech Ventures Pvt Ltd

April 2023 – June 2025

- Developed enterprise applications across CRM, LMS, and inventory systems using Laravel and CodeIgniter.
- Built REST APIs, Excel bulk upload pipelines, and dynamic PDF generation modules.
- Handled production deployment, hosting management, and MySQL query optimization.

Women’s Christian College (Freelance)

August 2025 – November 2025

- Built and deployed an academic management system covering admissions, student records, fee tracking, and reporting dashboards.

KEY PROJECTS

Governing Body Commission

- Secure workflow platform with structured resolution lifecycle tracking.
- Encrypted document management integrated with role-based access controls.
- Automated follow-ups and deadline notifications via Cron jobs.

Asset Management System

- Centralized asset allocation and tracking platform.
- Implemented maintenance scheduling and recurring audit automation.

LMS & Admission Management (Spark Learning)

- Built admission lifecycle workflows, fee structures, payment tracking, batch scheduling, and timetable modules.

CRM & Hierarchical Authority Management

- Designed structured ward, district, and subdistrict categorization.
- Implemented controlled access modules for authority-level updates.

Inventory & Migration Systems

- Developed structured inventory lifecycle management system using CodeIgniter.

EDUCATIONAL QUALIFICATION

| Degree/Certificate | Institution                     | Years       | Board/University    | Marks/Score  |
|--------------------|---------------------------------|-------------|---------------------|--------------|
| B.E. (CSE)         | Ponjesly College of Engineering | 2018 – 2022 | Anna University, TN | 7.77/10 CGPA |

PERSONAL STRENGTHS

- Strong coordination and leadership skills
- Enthusiastic and eager to learn
- Flexible and adaptable to dynamic environments
